HEALTH STARTS AT HOME

VON SMART COMMUNITY EXERCISE SITES - GUELPH

Intensity Descriptions

Low: This program is suitable for clients who may not have exercised before or have not exercised in a long time or for clients who have recently completed the SMART In-Home or Fab Fit program. Most of the exercises are performed in a seated position.

Moderate: This class is suitable for clients that are used to being physically active. Most of the exercises are performed standing but likely use a chair as a stability aid.

High: This program is suitable for clients that have good mobility and are used to exercising. Exercises are typically performed while standing and are not required to use a chair for a stability aid, although chairs are always available.

***Disclaimer:** The SMART program is designed so that any participant can attend any of the sites if most convenient for them as it can be modified for all different levels. These intensities are simply guidelines for the average participant attending the class. Any participant can sit for the entire class. All instructors offer the option of sitting to each of the participants in each class. We never want to put limits on any participants, and we believe that if a participant walks into the class, they should be able to exercise standing or at least do some of the exercises standing. SMART classes always offer chairs to be used as a base of support or for someone to sit in for either portion of the class or the entire class if that is how they feel most comfortable exercising.*
